

How To Make A Template For A Replacement Hot Tub Cover

Supplies Needed:

1. Clear sheet of plastic (recommend 4-6 mil thick plastic)
2. Sharpie or medium-thick black marker
3. Large envelope or package with postage

To achieve the perfect fit for your custom-shaped hot tub or tub with speakers, follow the steps below:

1. Obtain a **clear sheet of plastic** (like a crop sheet or clear shower curtain) and lay it over your old hot tub cover. Have two friends help you hold it tightly in place.
2. Take a **black Sharpie** or other permanent black marker and **trace the outer edge** all the way around the perimeter of the Styrofoam inside your old hot tub cover. (see red dotted lines in the diagrams to the right).
3. Mark on the plastic where you would like the **2 handles & 4 straps** to be placed, as well as the **length of the cover skirt**. *Standard skirt length is 4 inches. You may also request 2 standard additional handles for no extra charge.*
4. See blue lines and red handles marked in the diagrams to the right as an example.
5. Mark where you want the cover to **fold**.
6. If your cover has speakers, **trace the inside of the speakers** (the hard Styrofoam part of your cover).
7. On the top of the plastic template - **write your name, address, email and phone number(s)** and mail to:
Hot Tub Covers Canada
13 Capps Drive, Suite A
Barrie, ON L4N 0G9, Canada

Have further questions about your template? Give us a call at [1.877.544.COVER](tel:1.877.544.COVER)
